- Collaboration
- Creativity
- Analytical thinking

ABOUT ME

UX/UI Designer with a foundation in front-end development and visual design. I create intuitive, responsive interfaces through thoughtful UX strategy, prototyping, and usability testing. Experienced in designing web applications and complex industrial applications. I focus on translating user needs into clear, efficient, and visually engaging digital experiences.

WORK EXPERIENCE

SOFTWARE AND UI DEVELOPER INTERN

Midwest Engineered Systems (2024-2025)

- Designed and developed interactive HMI/SCADA interfaces in Ignition and FactoryTalk, improving usability, clarity, and operator workflow efficiency.
- Built custom dashboards and integrated real-time PLC data streams, enabling responsive controls and faster decision-making.
- Translated complex automation logic into intuitive visual behaviors, reducing cognitive load and increasing operator accuracy.
- Collaborated with engineers to support device configuration, network setup, and troubleshooting, ensuring reliable system performance and a seamless user experience.

DIGITAL CONTENT PRODUCER

LVN Ventures (2021-2022)

- Designed and produced digital and print marketing materials using Canva, ensuring brand clarity and consistency across all platforms.
- Created and edited product photography for e-commerce and promotional use, improving visual quality and customer engagement.
- Updated Shopify websites with refreshed visuals, copy, and layout improvements to enhance user experience and drive conversions.
- Supported daily operations by managing customer inquiries, order fulfillment, inventory, and packaging to maintain smooth business performance.
